About Me

As a passionate and detail-oriented full-stack developer, I am constantly striving to push the boundaries of web and mobile development. With a strong foundation in modern web technologies and a deep love for crafting intuitive, user-friendly applications, I bring a perfect blend of technical expertise and creative problem-solving to every project I undertake. My diverse skill set, spanning both front-end and back-end development, empowers me to build seamless, scalable applications that deliver outstanding user experiences. I thrive in fast-paced environments, always eager to embrace new challenges that foster personal and professional growth.

Technical Skills

Languages & Frameworks:

- HTML, CSS, JavaScript
- Bootstrap, Tailwind CSS
- React, Next.js, React Native
- Node.js, Express.js, MongoDB
- Java

Tools:

- Visual Studio Code
- Git, GitHub
- REST APIs
- Vercel (Deployment)
- Docker

Projects

Campscape

A Full-Stack Campgrounds Application

- Built a robust platform where users can register, add, and browse campgrounds.
- Integrated interactive maps, allowing users to visually locate campgrounds.
- Users can submit reviews and view campground details, enhancing the community-driven aspect of the platform.

Konnectus

Alumni Association Platform

- Developed a full-stack alumni network supporting students, staff, and alumni users with tailored experiences.
- Alumni can add testimonials, and staff can manage event creation, while students access job listings.
- Features include a dedicated dashboard for alumni and CRUD operations on events and job postings.

sKite

Blog Post Platform

- Designed and implemented a blog platform with three distinct user roles: Reader, Author, and Admin.
- Supports full CRUD functionality for blog posts, with rich text editor integration for content creation.
- Users can engage by adding comments to posts; blog posts also support image uploads for enhanced content.
